

### IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently amended) A light emitting device comprising:

an organic electroluminescence element, ~~said electroluminescence element~~  
comprising an anode, a cathode, and an organic EL film between the anode and the cathode,  
said organic EL film comprising:

an organic luminescent layer capable of converting triplet excitation energy into light to  
be emitted; and ,

wherein a host material for said is included in said organic luminescent layer,

wherein said host material comprises a material expressed by the following formula

2. (Original) An electronic appliance comprising said light emitting device according to claim 1, wherein said electronic appliance is selected from the group consisting of an organic electroluminescence display, a video camera, a digital camera, a portable computer, a personal computer, a mobile telephone, and an acoustic equipment.

3. (Currently amended) A light emitting device comprising:

an organic electroluminescence element, ~~said electroluminescence element~~  
comprising ~~an anode, a cathode, and an organic EL film between the anode and the cathode,~~  
said organic EL film comprising:

~~at least~~ a hole transport layer; and

an organic luminescent layer adjacent to said hole transport layer, said luminescent layer  
being capable of converting triplet excitation energy into light to be emitted; ~~and~~ ,

wherein said hole transport layer comprises a material expressed by the following formula

4. (Original) An electronic appliance comprising said light emitting device according to claim 3, wherein said electronic appliance is selected from the group consisting of an organic electroluminescence display, a video camera, a digital camera, a portable computer, a personal computer, a mobile telephone, and an acoustic equipment.

5. (Currently amended) A light emitting device comprising:

an organic electroluminescence element, ~~said electroluminescence element~~  
comprising ~~an anode, a cathode, and an organic EL film between the anode and the cathode,~~  
said organic EL film comprising:

~~at least an organic luminescent layer capable of converting triplet excitation energy into~~  
light to be emitted, said luminescent layer including a host material;

~~a host material for said luminescent layer;~~ and

a hole blocking layer provided adjacent to said luminescent layer,

wherein said hole blocking layer comprises a material expressed by the following  
formula

, and

wherein said host material comprises a material expressed by the following formula

6. (Original) An electronic appliance comprising said light emitting device according to claim 5, wherein said electronic appliance is selected from the group consisting of an organic electroluminescence display, a video camera, a digital camera, a portable computer, a personal computer, a mobile telephone, and an acoustic equipment.

7. (Currently amended) A light emitting device comprising:  
an organic electroluminescence element,~~said electroluminescence element~~  
comprising[[:]] an anode, a cathode, and an organic EL film between the anode and the cathode,  
said organic EL film comprising:

~~at least~~ an organic luminescent layer capable of converting triplet excitation energy into light to be emitted, said organic luminescent layer including a host material;

~~a host material for said luminescent layer;~~ and

a hole blocking layer provided adjacent to said organic luminescent layer,

wherein said hole blocking layer comprises a material expressed by the following formula

, and

wherein said host material comprises a material expressed by the following formula

8. (Original) An electronic appliance comprising said light emitting device according to claim 7, wherein said electronic appliance is selected from the group consisting of an organic electroluminescence display, a video camera, a digital camera, a portable computer, a personal computer, a mobile telephone, and an acoustic equipment.

9. (Currently amended) A light emitting device comprising:

an organic electroluminescence element, ~~said electroluminescence element~~ comprising[:]  
an anode, a cathode, and an organic EL film between the anode and the cathode, said organic EL film comprising:

~~at least~~ an organic luminescent layer capable of converting triplet excitation energy into light to be emitted; and

a hole blocking layer provided adjacent to said luminescent layer,

wherein said hole blocking layer comprises a material expressed by the following formula, and

wherein "A" indicates one of carbon or silicon

10. (Original) An electronic appliance comprising said light emitting device according to claim 9, wherein said electronic appliance is selected from the group consisting of an organic electroluminescence display, a video camera, a digital camera, a portable computer, a personal computer, a mobile telephone, and an acoustic equipment.

11. (Currently amended) A light emitting device comprising:

an organic electroluminescence element;~~said electroluminescence element~~

comprising[[:]] an anode, a cathode, and an organic EL film between the anode and the cathode,

said organic EL film comprising:

~~at least~~ an organic luminescent layer capable of converting triplet excitation energy into light to be emitted; and

a hole blocking layer provided adjacent to said luminescent layer,

wherein said hole blocking layer comprises a material expressed by the following formula, and

wherein “A” indicates one of carbon or silicon

12. (Original) An electronic appliance comprising said light emitting device according to claim 11, wherein said electronic appliance is selected from the group consisting of an organic electroluminescence display, a video camera, a digital camera, a portable computer, a personal computer, a mobile telephone, and an acoustic equipment.
